

Job Opening – Project Manager

HRS Water Consultants, Inc. is accepting resumes for a Project Manager who is passionate about solving water supply, water rights and environmental problems and has 7 to 15 years of professional experience. We seek a client-focused, seasoned hydrogeologist who is well-versed in the consulting business cycle and can work with our team to deliver high-quality proposals, work plans, and technical reports. Other responsibilities include scoping, coordinating, and managing hydrogeologic field investigations; overseeing contractor activities including borehole drilling, coring, sampling, and geophysical investigations; and quantitative analysis of hydrogeologic and environmental data. Candidates should have a BS in an earth-science related field (MS preferred), excellent written and oral communication skills, experience in quantitative hydrogeologic analysis, and education and experience in chemistry and/or geochemistry. Experience in project management and litigation support is a plus. Must have a strong health and safety focus and desire to work with others in a collaborative manner.

The ideal candidate will hold a Professional Geologist (PG) license in at least one US state or be qualified for a PG by education and experience, or a Professional Engineering (PE) license – Water Resources and Environmental – in Colorado. Must have solid experience in technical consulting with a strong emphasis in collection and management of field data, data analysis, statistics, and mathematical analysis.

The salary range for this position is \$90,000 to \$120,000 and may be negotiable depending on education, certifications, experience, and special skills. Other benefits include health insurance, paid time off, and a 401(k) retirement savings plan with company match. Also, HRS may offer end-of-year bonuses depending on the financial performance of the company.

HRS is a small, multi-disciplinary consulting firm established in 1981 focused on solving a variety of groundwater problems for clients. We are leaders in water resources engineering, hydrogeology, environmental contamination and remediation, water rights, numerical modeling, water well design and testing, and related consulting services in Colorado and the Intermountain West. HRS Water Consultants, Inc. is an Equal Opportunity Employer, and we value workplace diversity.

If interested in applying for this position, please send a letter of interest and resume to hrrwater@hrrwater.com.
